Webpage Choice and Explanation

Home Page

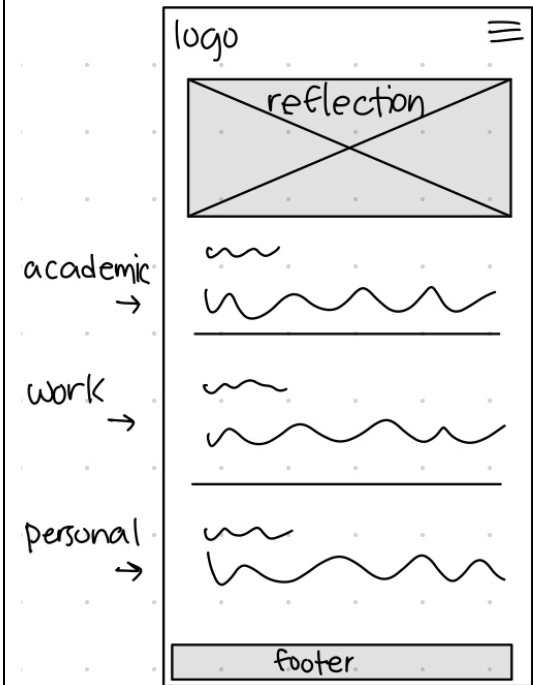

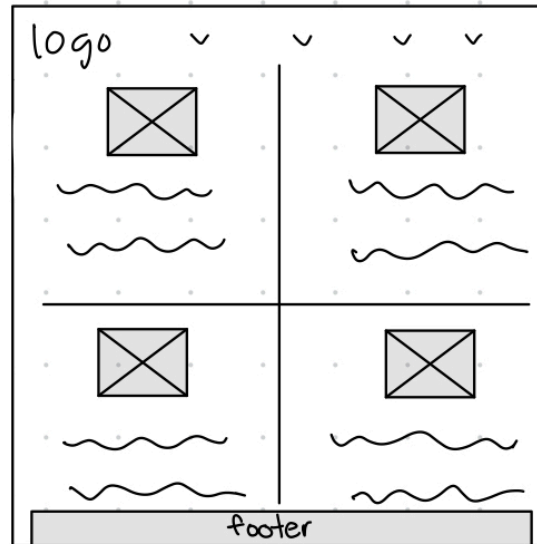

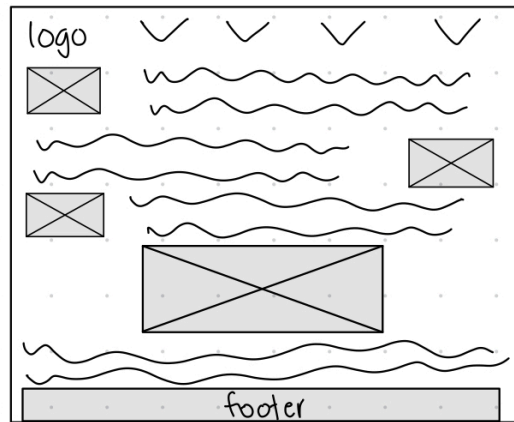

I used a hero image with my tagline so the page feels like an introduction. The button goes to my About page so people know where to start. I added a preview of my projects so it shows right away what the site is about. On smaller screens it all stacks and the menu changes to a hamburger.

About Me Page

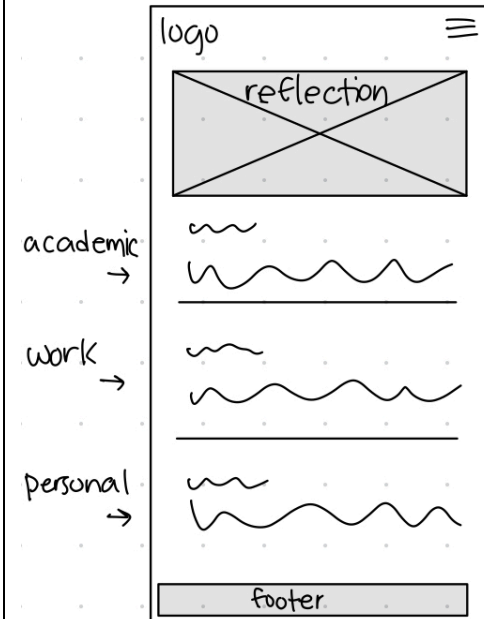

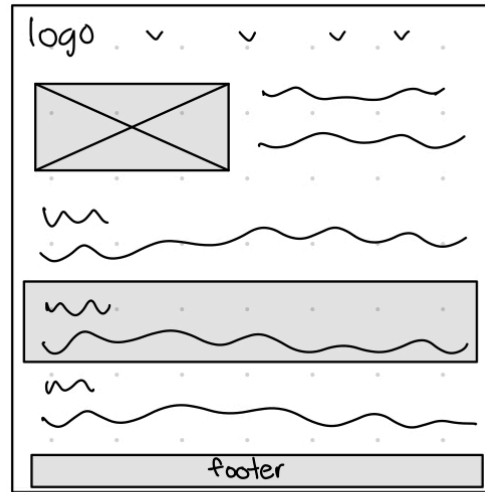

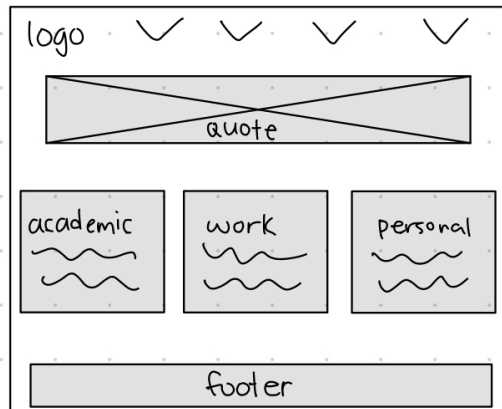

My About page has a headshot and bio at the top so it's personal. I made three blocks for my education, resume, and a quote so the important info stands out. On desktop they're side by side, but on tablet and mobile they stack so it's easier to read.

Projects Page

I showed my four projects—Ticket Office, Brown & Root, Starbucks, and Pyrography—in separate blocks. I changed how each looks a little so the page isn't just the same box repeated. On desktop they're spaced out more, and on smaller screens they go straight down the page.

Reflection Page

I split my reflection into three parts: school lessons, work lessons, and personal growth. Each has its own section so the ideas don't blend together. On desktop they're side by side, and on tablet and mobile they stack in one column.

Contact Page

A hand-drawn wireframe for a desktop contact page. At the top left is the word "logo" followed by four checkmarks. Below this, the page is split into two columns by a vertical line. The left column is labeled "contact form:" and contains three wavy lines representing input fields, followed by an oval button labeled "submit". The right column is labeled "contact info:" and contains three wavy lines representing text. At the bottom of the page is a grey rectangular footer labeled "footer".

A hand-drawn wireframe for a tablet contact page. At the top left is the word "logo" followed by four checkmarks. Below this, the "contact form" and "contact info" sections are stacked vertically. The "contact form" section has three wavy lines, and the "contact info" section has two wavy lines. At the bottom is a grey rectangular footer labeled "footer".

A hand-drawn wireframe for a mobile contact page. At the top left is the word "logo" and at the top right is a hamburger menu icon. Below the logo, the "contact form" and "contact info" sections are stacked vertically. The "contact form" section has two wavy lines, and the "contact info" section has two wavy lines. At the bottom is a grey rectangular footer labeled "footer".

My contact page has a form to send a message and also a space for my contact info. On desktop they're side by side, and on tablet and mobile the form goes on top with info under it.
