

Website Design Plan

Section 1: Website Type & Purpose

I plan to build a Portfolio website as my project. I will include college work, job experiences, and some creative projects on my site. My target audience is future employers in project or operations management. This website will be a useful resource when I start looking for jobs after graduation. I think it will also be a good way to explain my academic background and personal interests.

Section 2: Home Page Content

Welcome Statement:

Welcome to my portfolio! Here you can find my academic work, job experiences, and projects that represent me.

Paragraph:

My home page will be an introduction of who I am and what I bring to the table. It will highlight my education, work, and project experience. I will include my General Studies degree program with concentrations in Mathematics, Industrial Engineering, and Engineering. I will also feature my work experiences and explain what I have learned from them, such as leadership, teamwork, and adaptability. To show a little of my personal side, I plan to include one creative project, like pyrography, because it shows detail and creativity. The goal of my home page is to give future employers a strong first impression and make them want to learn more about me through the rest of my site.

Background:

I plan to use blue like greens like emerald, forest, and sage. These colors are calming and professional, and I think they will help create a focused, welcoming first impression.

Quote/Tagline:

Building systems, creating balance.

Section 3: About Page Content

Bio:

Hello, my name is Jasmine Hill, and I am a senior at the University of Missouri. I plan to graduate in May 2026 with a Bachelor of General Studies, concentrating in Mathematics, Industrial Engineering, and Engineering. My degree path has strengthened my problem-solving skills and taught me how to look at systems from different perspectives. I have also gained a lot from my work experience during college. At the Mizzou Athletics ticket office, I worked as a supervisor, which helped me grow in leadership and customer service. My internship with Brown & Root Industrial Services gave me project management experience and showed me how important communication is for keeping projects on track. My current role as a Starbucks barista has helped me learn teamwork and flexibility in a fast-paced environment. Outside of school and work, I enjoy pyrography and reading. These creative hobbies push me to be more patient and less focused on perfect answers, since creativity looks different every time.

Education Overview:

Bachelor of General Studies, University of Missouri (expected May 2026)

- Concentrations: Mathematics, Industrial Engineering, Engineering
- Dean's Honor Roll: Fall 2022, Spring 2023, Fall 2024

Professional Headshot:

I plan to use a graduation photo as my professional headshot once I have them taken. If those aren't ready in time, I will take a simple photo with a plain background and good lighting, so it looks clean and professional.

Resume Video:

I will record a 30-60 second introduction video which will include the following:

- Name
- Degree and graduation date
- Concentrations in Mathematics, Industrial Engineering, and Engineering
- Work experience
- Career interests in project or operations Management

Resume:

Included separately as Hill_Resume.pdf

Section 4: Projects/Experience Page

1. Ticket Office Supervisor – Mizzou Athletics (August 2022 – May 2024)

At the Mizzou Athletics ticket office, I supervised student workers and handled event operations. I trained new employees, handled cash, and worked with customers during busy game days. This role gave me leadership experience and taught me how to help a team work effectively.

Artifact: Mizzou Athletics event poster and Mizzou Athletics logo.

2. Project Management Intern - Brown and Root Industrial Services (May 2024 – January 2025)

As a project management intern, I assisted with project documentation and communication. A lot of my work was keeping schedules updated, working in Excel, and communicating between the office, the contractor, and the field. This gave me a better understanding of how projects operate from start to finish and how valuable open communication is.

Artifact: Project schedule and the Brown and Root logo.

3. Barista – Starbucks (July 2025 – Present)

I currently work as a barista at Starbucks, where I've learned how to handle a fast-paced environment while working as part of a team. This job has taught me to adapt quickly, manage multiple responsibilities at once, and stay calm during busy rushes. It has also helped me build strong communication skills with both customers and coworkers. I can see how these skills connect to future roles in operations or project management, where flexibility and teamwork are just as important.

Artifact: Starbucks logo.

4. Creative Project – Pyrography (ongoing)

I enjoy pyrography, which is a form of wood-burning art. I create designs on wooden slabs, and the process requires patience, focus, and attention to detail. This project is very different from my academic and work experiences because there isn't one "right" answer. Every piece turns out unique, and that has taught me to slow down,

be patient, and step away from perfectionism. Pyrography gives me a creative outlet and shows another side of me beyond school and work.

Artifact: Photos of pyrography pieces.

Section 5: Reflection

Through my General Studies program at the University of Missouri, I've had the chance to study in different areas instead of just one. Mathematics has pushed me to be a better problem solver, while engineering courses made me think more about how systems work together. I've also learned to pay attention to efficiency and how small changes can affect success. For me, this mix of classes has shaped the way I look at problems and how I go about solving them.

My work experiences have also taught me things I couldn't get from the classroom alone. At the Mizzou Athletics ticket office, I learned how to step up as a leader by helping train other student workers and supporting customers during busy events. My internship with Brown & Root gave me a first look at project management and showed me how important organization and communication are. Working at Starbucks has taught me how to stay calm when things are hectic and how to rely on teamwork to get through busy shifts.

Outside of school and work, I've found balance in hobbies that let me be creative. Pyrography, or wood-burning art, has taught me patience and helped me let go of perfectionism since no two pieces turn out the same. Reading has also given me a way to recharge and focus on something outside of school and work. Both of these hobbies help me keep perspective and remind me that balance is just as important as achievement.

Looking ahead, I want to build a career in project or operations management. I am interested in roles where I can use the skills I've built in leadership, teamwork, and problem-solving to support projects and keep them on track. My goal is to continue learning and growing while helping organizations work more efficiently and effectively.
